Certification Training / Exam

The Committee is evaluating the feasibility of IWEA offering collection systems certification exam training. It has in the past and the Committee has an interest in providing it. The Committee has appointed a core group to plan and provide the training and is contacting IEPA and others for more information and coordination. The training could be offered in Springfield as part of the annual conference each year, or every other year, or at a northern Illinois municipality.

2019 Committee Goals

The goals of the committee this year are to continue building upon our successful annual seminar, highlight collection system problems and subsequent solutions to support and educate the IWEA membership, and support certifications programs for operators of collection systems.
